HOSPITAL - NURSING HOME FURNITURE

# Siena

The Siena nursing bed combines user-friendliness with a highly functional and efficient mattress platform.

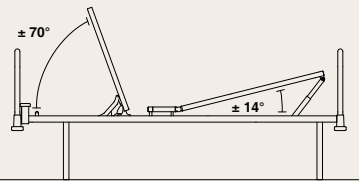

001	<b>Sideguards (*) • Safety has no price</b>
	The Atmosphère sideguards protect the patient over 2/3 of the bed length, whereas the Pollux or Trix sideguards offer maximum patient protection over the entire bed length.
002	<b>Mattress platform • For a comfortable lying position</b>
	You can choose between 2 different mattress platforms. The standard version is equipped with well-ventilating metal mattress platform profiles. The optional solid laminate mattress platform sections (*) can be easily removed and cleaned.
003	<b>Bed panels • A harmonious duo</b>
	You can choose between 4 different bed panel types. All types give the bed a tasteful wooden touch.
004	<b>Mattress holders • Purposefully present</b>
	The mattress holders prevent the mattress from moving towards the bed sides. They can also be used as a handle to adjust the backrest and knee rest manually.
005	<b>Cases • Optimal care</b>
	Two cases are provided at the head of the bed, and can be used to install an IV rod, a lifting pole or other accessories.
006	<b>Operating lever • Central and within reach</b>
	The operating lever activates a gas spring, so that the desired mattress platform section can be adjusted. Optionally, the backrest and legrest adjustments can be activated electrically (*). It is also possible to switch off the electric functions with one single button on the lock device (*).
007	<b>Accessory holders (*) • First-class functionality</b>
	Three multifunctional holders on both sides make it possible to install accessories very fast and easily.
008	<b>Wooden surrounds of the mattress platform frame (*) • An extra trump</b>
	The wooden surrounds on the mattress platform frame give the bed a homely look.
009	<b>Bed extension • Increased flexibility</b>
	The standard integrated bed extension makes it possible to extend the bed with 20 cm. The optional footrest extension (*) guarantees a complete functionality of the mattress platform.
010	<b>Castors (*) • Superb manoeuvrability</b>
	Our extensive gamut of high-quality design castors guarantees a highly mobile and manoeuvrable bed.

# Comfort for everyone

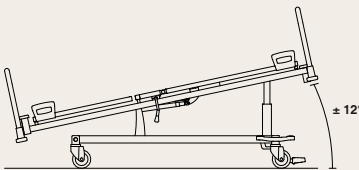

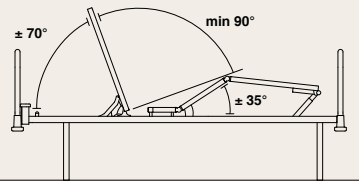

Nowadays, both the resident and nursing staff demand comfortable and ergonomic beds. Only then, the resident can be as autonomous as possible, whereas the nursing staff can work efficiently.

- Activations

The operating lever is user-friendly and easily accessible on both sides of the bed.

**Seating or relax position**  
The three- or four-section (\*) mattress platform offers ample adjustment possibilities and can be easily activated on both sides of the bed. Thanks to this, the desired seating position – or relax position (\*) in case of a four-section mattress platform – can be easily obtained. Optionally, the backrest and legrest adjustments can be activated electrically by means of a hand switch (\*). You can also opt for a lock device (\*) which makes it possible to switch off several electric bed functions with one single button.

**Trendelenburg position**  
The Trendelenburg position (\*) can be activated by means of the red pedal at the foot of the bed. When the pedal is stepped on, the bed inclines fluently until the desired position is obtained.

- Retracting backrest

A retracting backrest increases the patient's lying comfort considerably. While inclining the backrest upwards, it is automatically moved backwards. By doing so, pressure is relieved on the pelvis, whereas the bedsore risk is reduced substantially.

- High/low carriage

The high/low carriage Vico (\*) can be installed very easily to obtain a complete high/low bed. Combined with the removable synthetic cover cap (\*), even the surfaces that are difficult to reach can be cleaned easily.

# User-friendly

Particular attention has been paid to efficient care during the development of the Siena bed.

- Castors - Excellent mobility

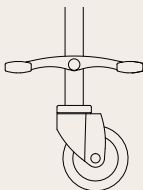

The daily use of the Siena bed is simplified, thanks to its excellent mobility and manoeuvrability. You can choose from our extensive gamut of castors (Ø 100 mm or Ø 125 mm) with or without central brakes (\*).

standard on fixed legs or height-adjustable (\*) legs

castors Ø 100 mm with individual brakes, optionally height-adjustable (\*)

castors Ø 125 mm with central brake and directional castor (\*)  
The directional castor makes it easy to move the bed in a straight line.

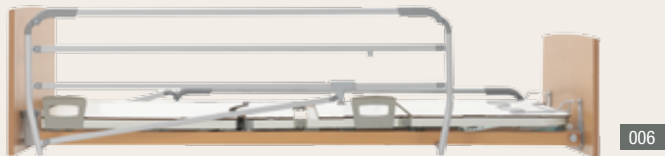

- Bed extension

A nursing bed has to meet everyone's needs, irrespective of the patient's length. The integrated bed extension makes it possible to extend the bed with 20 cm.

Two different methods are possible to extend the mattress platform. You can choose between telescopic footrest extension combined with the extendible Trix sideguards or a removable footrest extension of 20 cm.

# Safety galore

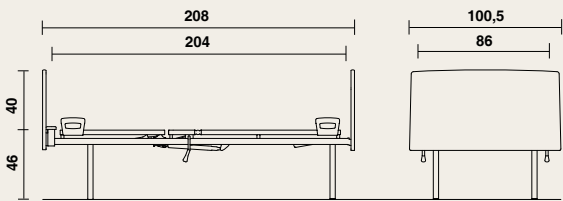

- 001 The Siena Care bed combined with the Atlas bedside table.
- 002 The operating lever.
- 003 The Trendelenburg pedal (\*).
- 004 The retracting backrest of the mattress platform.
- 005 The Trix sideguards (\*) protect the resident over the entire bed length, thanks to the unique telescopic extension.
- 006 The Siena Care bed with solid laminate mattress platform sections (\*), Atmosphère sideguards (\*) and wooden surrounds (\*).
- 007 The Siena Care bed with steel mattress platform profiles, Pollux sideguards (\*), and wooden surrounds (\*).
- 008 The Siena Care bed with steel mattress platform profiles, Trix sideguards (\*), and wooden surrounds (\*).

# Accessories

The accessories we offer can be harmoniously connected with the existing cases and accessory holders. Haelvoet strongly pays attention to this, so that the accessories offer you the same top quality as our nursing beds. After all, only the best quality is good enough for our customers.

001	Lifting pole	006	IV rod
	The lifting pole is made of a bent thick-walled steel tube. It is equipped with a handle and a ribbon that can be manually adjusted. An automatic roll-up system is optionally available as well.		The IV rod consists of a fixed and a height-adjustable part that is equipped with 4 hooks. The IV rod is also available in a non-adjustable version with 2 hooks.
002	IV rod for lifting pole	007	Raising aid (*)
	The IV rod for the lifting pole consists of 4 hooks and can be easily installed on the lifting pole.		The ergonomically-designed raising aid offers optimal patient support while getting in and out of the bed.
003	Dinner tray for sideguards (*)	008	Urine bottle holder (*)
	The wooden dinner tray can be installed on all types of sideguards. It can be easily hung onto the foot panel.		The urine bottle holder is installed in two optional synthetic accessory hooks. You can choose between two different models.
004	Accessory bracket (*)	009	Cover for sideguards (*)
	The accessory bracket can be used in case of specific customer needs. The bracket has 4 hooks and has a length of 310 mm. It is put in the optional accessory hooks.		The removable cover is made of imitation leather and can be easily put around the sideguards. This cover is especially recommended to protect restless residents.
005	Bowl holder (*)	010	Removable footrest extension (*)
	Two bowls can be placed into the bowl holder. The holder is installed in the optional accessory hooks.		To use the mattress platform optimally when the bed is extended, you can opt for a removable footrest extension of 20 cm that has to be put at the foot end.
